AMENDMENT

Sir:

In response to the Office Action of August 19, 2002, please amend the application, as follows:

IN THE SPECIFICATION

Delete paragraph 0008 and add, as follows:

B1
[0008] An antireflection film of the present invention is composed of an organic film, a hard-coating layer, a high refractive index layer and a low refractive index layer, in which these layers are laminated on the surface of the organic film, in that order. The high refractive index layer includes at least two kinds of metal oxide particles, and at least one kind of the metal oxide particles are electrically conductive.

Delete paragraph 0016, and add, as follows:

B2
[0016] The high refractive index layer 3 includes at least two kinds of metal oxide particles, and at least one kind of the metal oxide particles is electrically conductive. The electrically
